1. INTRODUCTION

1.1 Project Overview

"The **Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study** is an interactive, data-driven web application designed to analyze the dietary habits and health awareness of college students. In the academic environment, food choices significantly impact student well-being, yet students often lack accessible information regarding nutritional values and consumption trends. Traditional methods of food tracking are manual, time-consuming, and fail to provide actionable insights. This project simplifies and automates the analysis process by leveraging Tableau's visualization capabilities integrated with a Flask-based web interface. The system collects and processes student dietary data, allowing users to explore food consumption patterns, health correlations, and nutritional trends through dynamic, interactive dashboards. By combining data analytics with web technology, this project demonstrates how visual intelligence can be applied to foster better nutritional awareness and promote healthier lifestyle choices among students."

1.2 Purpose

"The primary purpose of the **Comprehensive Analysis and Dietary Strategies with Tableau** project is to bridge the gap between complex dietary data and student health awareness by automating the visualization process. Instead of relying on manual surveys or static reports, this system empowers students and administrators to analyze food intake patterns, lifestyle choices, and health outcomes in real-time. This approach minimizes human error, reduces data processing time, and provides clear, data-driven insights that are easy to interpret.

Another core objective is to demonstrate the practical application of Business Intelligence (BI) tools in the education and wellness sector. The system provides an interactive platform where students can visualize their eating habits and understand the correlation between food choices and daily physical activity. Additionally, this project enhances technical proficiency in data cleaning, Flask web framework integration, and Tableau dashboard design. The platform is designed to be scalable, offering a foundation for future enhancements such as AI-driven personalized diet recommendations and integration with broader institutional wellness programs, making it a sustainable solution for fostering a healthier campus environment."

Ideation Phase

Brainstorm & Idea Prioritization Template

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Brainstorm & Idea Prioritization Template:

Brainstorming provides a free and open environment that encourages everyone within a team to participate in the creative thinking process that leads to problem solving. Prioritizing volume over value, out-of-the-box ideas are welcome and built upon, and all participants are encouraged to collaborate, helping each other develop a rich amount of creative solutions.

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

Reference: <https://www.mural.co/templates/brainstorm-and-idea-prioritization>

Step-1: Team Gathering, Collaboration and Select the Problem Statement

Brainstorm & idea prioritization

Use this template in your own brainstorming sessions so your team can unleash their imagination and start shaping concepts even if you're not sitting in the same room.

⌚ 10 minutes to prepare
🕒 1 hour to collaborate
👥 2-8 people recommended

➔ Before you collaborate
A little bit of preparation goes a long way with this session. Here's what you need to do to get going.
⌚ 10 minutes

A Team gathering
Define who should participate in the session and send an invite. Share relevant information or pre-work ahead.

B Set the goal
Think about the problem you'll be focusing on solving in the brainstorming session.

C Learn how to use the facilitation tools
Use the Facilitation Superpowers to run a happy and productive session.
[Open article](#) ➔

1 Define your problem statement
What problem are you trying to solve? Frame your problem as a How Might We statement. This will be the focus of your brainstorm.
⌚ 5 minutes

PROBLEM

How might we [your problem statement]?

Key rules of brainstorming
To run a smooth and productive session

➕ Stay in topic.

💡 Encourage wild ideas.

➕ Defer judgment.

👂 Listen to others.

🗣️ Go for volume.

👁️ If possible, be visual.

Step-2: Brainstorm, Idea Listing and Grouping

Step-2: Brainstorm, Idea Listing and Grouping

2

Brainstorm

Write down any ideas that come to mind that address your problem statement.

🕒 10 minutes

TIP

You can select a sticky note and hit the pencil (switch to sketch) icon to start drawing!

Amar

Yuktesh

Person 3

Person 4

Person 5

Person 6

Person 7

Person 8

3

Group ideas

Take turns sharing your ideas while clustering similar or related notes as you go. In the last 10 minutes, give each cluster a sentence-like label. If a cluster is bigger than six sticky notes, try and see if you can break it up into smaller sub-groups.

🕒 20 minutes

Person 4

TIP

Add customizable tags to sticky notes to make it easier to find, browse, organize, and categorize important ideas as themes within your mural.

Step-3: Idea Prioritization

4

Prioritize

Your team should all be on the same page about what's important moving forward. Place your ideas on this grid to determine which ideas are important and which are feasible.

🕒 20 minutes

Ideation Phase

Define the Problem Statements

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - who are they?	Describe the customer and their attributes here
I'm trying to	List their outcome or "job" the care about - what are they trying to achieve?	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way - what bothers them most?	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists - what needs to be solved?	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view - how does it impact them emotionally?	Describe the emotions the result from experiencing the problems or barriers

Reference: <https://miro.com/templates/customer-problem-statement/>

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
PS-1	A college student	Choose healthy food options in canteen	There is a lack of nutritional information	The current menu doesn't show calorie or health data	Confused about my diet
PS-2	Track my daily food intake habits	Track my daily food intake habits	It's hard to visualize my eating patterns	Manual tracking is time consuming and difficult	Frustrated with my lifestyle

Empathy Map Canvas:

An empathy map is a simple, easy-to-digest visual that captures knowledge about a user's behaviours and attitudes.

It is a useful tool to help teams better understand their users.

Creating an effective solution requires understanding the true problem and the person who is experiencing it. The exercise of creating the map helps participants consider things from the user's perspective along with his or her goals and challenges.

Example:

Empathy Map

Project Design Phase-II Data Flow Diagram & User Stories

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

Example: [\(Simplified\)](#)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	I can access my account / dashboard	High	Sprint-1
Customer (Mobile user)	Registration	USN-2	As a user, I will receive confirmation email once I have registered for the application	I can receive confirmation email & click confirm	High	Sprint-1
Customer (Mobile user)	Registration	USN-3	As a user, I can register for the application through Facebook	I can register & access the dashboard with Facebook Login	Low	Sprint-2
Customer (Mobile user)	Registration	USN-4	As a user, I can register for the application through Gmail	Dashboard is accessible via Gmail login	Medium	Sprint-1
Customer (Mobile user)	Login	USN-5	As a user, I can log into the application by entering email & password	User is redirected to the main dashboard	High	Sprint-1
Customer (Web user)	Dashboard	USN-6	As a student, I can view dietary habit insights on the dashboard.	Dashboard displays interactive charts successfully.	High	Sprint-2
Customer (Web user)	Data Analysis	USN-7	As a student, I can filter food data by category.	Data updates dynamically based on user filters.	High	Sprint-2
Administrator	Application Support	USN-8	As a support executive, I can resolve student queries regarding diet logs.	Support requests are resolved efficiently.	Medium	Sprint-3
Customer Care Executive	User Management	USN-9	As an administrator, I can manage student accounts and access.	User records are updated successfully.	High	Sprint-3
Administrator	System Monitoring	USN-10	As an administrator, I can monitor dashboard performance	Performance reports are available.	Medium	Sprint-3

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form Registration through Gmail Registration through LinkedIn
FR-2	User Confirmation	Confirmation via Email Confirmation via OTP
FR-3	Food Choice Selection	Select food categories, view nutritional data
FR-4	Data Visualization	Display interactive Tableau charts , filter analysis
FR-5	Report Generation	Generate and download health analysis reports as PD
FR-6	Personalized feedback	View dietary habit analysis and health-based recommendations

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	Simple and user-friendly interface for students
NFR-2	Security	Student data and dietary logs must be securely stored
NFR-3	Reliability	Accurate and consistent food data analysis results
NFR-4	Performance	Dashboard visualization should load within 3 seconds
NFR-5	Availability	Application should be accessible 24*7 for students
NFR-6	Scalability	System should support multiple concurrent student users

**Project Design Phase-II
Technology Stack (Architecture & Stack)**

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Example: Order processing during pandemics for offline mode

Reference: <https://developer.ibm.com/patterns/ai-powered-backend-system-for-order-processing-during-pandemics/>

Guidelines:

- Include all the processes (As an application logic / Technology Block)
- Provide infrastructural demarcation (Local / Cloud)
- Indicate external interfaces (third party API's etc.)
- Indicate Data Storage components / services
- Indicate interface to machine learning models (if applicable)

Table-1 : Components & Technologies:

S.No	Component	Description	Technology
1.	User Interface	How user interacts with application e.g. Web UI, Mobile App, Chatbot etc.	HTML, CSS, JavaScript / Angular Js / React Js etc.
2.	Application Logic-1	Logic for a process in the application	Java / Python
3.	Application Logic-2	Logic for a process in the application	IBM Watson STT service
4.	Application Logic-3	Logic for a process in the application	IBM Watson Assistant
5.	Database	Data Type, Configurations etc.	MySQL, NoSQL, etc.
6.	Cloud Database	Database Service on Cloud	IBM DB2, IBM Cloudant etc.
7.	File Storage	File storage requirements	IBM Block Storage or Other Storage Service or Local Filesystem

8.	External API-1	Purpose of External API used in the application	IBM Weather API, etc.
9.	External API-2	Purpose of External API used in the application	Aadhar API, etc.
10.	Machine Learning Model	Purpose of Machine Learning Model	Object Recognition Model, etc.
11.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration :	Local, Cloud Foundry, Kubernetes, etc.

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology
1.	Open-Source Frameworks	List the open-source frameworks used	Technology of Opensource framework
2.	Security Implementations	List all the security / access controls implemented, use of firewalls etc.	e.g. SHA-256, Encryptions, IAM Controls, OWASP etc.
3.	Scalable Architecture	Justify the scalability of architecture (3 – tier, Micro-services)	Technology used
4.	Availability	Justify the availability of application (e.g. use of load balancers, distributed servers etc.)	Technology used
5.	Performance	Design consideration for the performance of the application (number of requests per sec, use of Cache, use of CDN's) etc.	Technology used

Project Design Phase
Problem – Solution Fit Template

Date	30 June 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) Who is your customer? I.e. working parents of 0-5 y.o. kids	CS	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? I.e. spending power, budget, no cash, network connection, available devices.	CC	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? I.e. pen and paper is an alternative to digital notetaking	AS	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? There could be more than one; explore different sides.	J&P	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? I.e. customers have to do it because of the change in regulations.	RC	7. BEHAVIOUR What does your customer do to address the problem and get the job done? I.e. directly related: find the right solar panel installer, calculate usage and benefits; Indirectly associated: customers spend free time on volunteering work (I.e. Greenpeace)	BE	
Identify strong TR & EM	3. TRIGGERS What triggers customers to act? I.e. seeing their neighbour installing solar panels, reading about a more efficient solution in the news.	TR	10. YOUR SOLUTION If you are working on an existing business, write down your current solution first, fill in the canvas, and check how much it fits reality. If you are working on a new business proposition, then keep it blank until you fill in the canvas and come up with a solution that fits within customer limitations, solves a problem and matches customer behaviour.	SL	8. CHANNELS of BEHAVIOUR 8.1 ONLINE What kind of actions do customers take online? Extract online channels from #7	CH	Extract online & offline CH of BE
	4. EMOTIONS: BEFORE / AFTER How do customers feel when they face a problem or a job and afterwards? I.e. lost, insecure > confident, in control - use it in your communication strategy & design.	EM			8.2 OFFLINE What kind of actions do customers take offline? Extract offline channels from #7 and use them for customer development.

**Project Design Phase
Proposed Solution Template**

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	2 Marks

Proposed Solution Template:

Project team shall fill the following information in the proposed solution template.

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	College students often struggle with making informed nutritional choices due to the lack of accessible and understandable dietary data.
2.	Idea / Solution description	Develop an interactive, web-based dashboard using Tableau and Flask to visualize student food consumption patterns and provide health-conscious insights.
3.	Novelty / Uniqueness	Combines real-world college food consumption datasets with interactive BI tools to offer personalized nutritional awareness at an institutional level.
4.	Social Impact / Customer Satisfaction	Promotes healthier eating habits among students, raising awareness about nutritional balance and long-term health outcomes.
5.	Business Model (Revenue Model)	Can be implemented as a health-tech service for college cafeterias or wellness programs through institutional subscriptions.
6.	Scalability of the Solution	The dashboard architecture allows for the integration of larger datasets from multiple campuses and the addition of predictive health analytics.

Project Design Phase Solution Architecture

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Solution Architecture:

Solution architecture is a complex process – with many sub-processes – that bridges the gap between business problems and technology solutions. Its goals are to:

- Find the best tech solution to solve existing business problems.
- Describe the structure, characteristics, behavior, and other aspects of the software to project stakeholders.
- Define features, development phases, and solution requirements.
- Provide specifications according to which the solution is defined, managed, and delivered.

Example - Solution Architecture Diagram:

Figure 1: Architecture and data flow of the voice patient diary sample application

Reference: <https://aws.amazon.com/blogs/industries/voice-applications-in-clinical-research-powered-by-ai-on-aws-part-1-architecture-and-design-considerations/>

Project Planning Phase

Project Planning Template (Product Backlog, Sprint Planning, Stories, Story points)

Date	30 Jun 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	5 Marks

Product Backlog, Sprint Schedule, and Estimation (4 Marks)

Use the below template to create product backlog and sprint schedule

Sprint	Functional Requirement (Epic)	User Story Number	User Story / Task	Story Points	Priority	Team Members
Sprint-1	Registration	USN-1	As a user, I can register for the application by entering my email, password, and confirming my password.	2	High	Team
Sprint-1	Dashboard	USN-2	As a user, I will receive confirmation email once I have registered for the application	1	High	Team
Sprint-2	Application Support	USN-3	As a user, I can register for the application through Facebook	2	Low	Team
Sprint-1	System Monitoring	USN-4	As a user, I can register for the application through Gmail	2	Medium	Team
Sprint-1	Login	USN-5	As a user, I can log into the application by entering email & password	1	High	Team
	Dashboard					

Project Tracker, Velocity & Burndown Chart: (4 Marks)

Sprint	Total Story Points	Duration	Sprint Start Date	Sprint End Date (Planned)	Story Points Completed (as on Planned End Date)	Sprint Release Date (Actual)
Sprint-1	20	3 Days	24 Jun 2026	26 Jun 2026	20	26 Jun 2026
Sprint-2	20	2 Days	27 Jun 2026	28 Jun 2026	20	28 Jun 2026
Sprint-3	20	5 Days	29 Jun 2026	30 Jun 2026	20	30 Jun 2026
Sprint-4	20	6 Days	01 Jul 2026	03 Jul 2026	20	03 Jul 2026

Velocity:

Imagine we have a 10-day sprint duration, and the velocity of the team is 20 (points per sprint). Let's calculate the team's average velocity (AV) per iteration unit (story points per day)

$$AV = \frac{\text{sprint duration}}{\text{velocity}} = \frac{20}{10} = 2$$

Burndown Chart:

A burn down chart is a graphical representation of work left to do versus time. It is often used in agile software development methodologies such as Scrum. However, burn down charts can be applied to any project containing measurable progress over time.

Functional & Performance Testing

Project Performance Test

Date	30 June 2026
Team ID	SWUID2026226489 SWUID2026226490 SWUID2026226275
Project Name	Comprehensive Analysis and Dietary Strategies with Tableau: A College Food Choices Case Study
Maximum Marks	4 Marks

Model Performance Testing:

Project team shall fill the following information in model performance testing template.

S.No.	Parameter	Screenshot / Values
1.	Data Rendered	Screenshot of Tableau Public connected to CSV source
2.	Data Preprocessing	Value: Cleaned and structured dietary dataset with 0 null values.
3.	Utilization of Filters	Screenshot of dynamic category/demographic filters applied.
4.	Calculation fields Used	Value: Applied 'Nutritional Index' and 'Calorie Count' calculated fields.
5.	Dashboard design	No of Visualizations / Graphs – 6 interactive charts
6	Story Design	No of Visualizations / Graphs -2 interactive story points

7.1 Output Screenshots

The **Comprehensive Analysis and Dietary Strategies with Tableau** project was successfully developed and tested using a Python-Flask web framework. The application integrates an interactive Tableau dashboard to visualize complex student dietary data. The system enables users to explore various parameters such as weight, exercise frequency, vitamin consumption, and comfort food preferences through dynamic, data-driven visual representations

Home Page

The home page of the **Food Choice Analysis Dashboard** provides an intuitive overview of the college food choices study. It introduces the primary purpose of the application, which is to analyze and visualize the dietary patterns and nutritional trends of college students.

8. ADVANTAGES & DISADVANTAGES

Advantages

1. **Data-Driven Insights:** Provides fast and accurate analysis of student dietary patterns and health correlations.Reduces manual effort in the loan approval process.
2. **Reduces Manual Effort:** Automates the visualization process, eliminating the need for manual data surveys and static reportEasy-to-use and user-friendly web interface.
3. **Improves Decision-Making:** Helps students and administrators make informed choices regarding health and nutritional well-beingSupports real-time loan prediction.
4. **Interactive Interface:** Offers an easy-to-use and intuitive web interface for exploring complex health metrics.
5. **Efficiency:** Saves significant time in data processing and trend identification for researchers and students.
6. **Real-Time Analytics:** Supports real-time exploration of student food choices through dynamic dashboard filters.

Disadvantages

Data Quality Dependency: The accuracy and reliability of the dashboard depend heavily on the quality and completeness of the student dietary dataset.

Maintenance: The dashboard may require updates or refinements when newer survey data or broader nutritional metrics become available.

User Input Errors: Inaccurate data entry during surveys can lead to skewed visualization results

Scope Limitation: The system provides analytical insights and cannot replace Of personalized medical or professional dietary consultation.

9. CONCLUSION

The **Comprehensive Analysis and Dietary Strategies with Tableau** project was successfully developed and tested using data visualization and web integration techniques. The application effectively analyzes and presents college students' dietary habits, providing quick and reliable visual insights. By automating data exploration, the project reduces manual analysis effort, improves institutional understanding of student health trends, and demonstrates the practical application of BI tools in the education and wellness sector..

10. FUTURE SCOPE

- Integrate real-time survey data collection forms directly into the dashboard.
- Develop advanced predictive analytics to forecast nutritional health trends among students.
- Add personalized user profiles for students to track their individual dietary progress.
- Deploy the application on cloud platforms for global accessibility.
- Create a mobile-optimized version for convenient access on the go.
- Generate automated monthly health recommendation reports for campus wellness programs.
